to me

Dear Dr. Taitz,

I have seen lots of posts like this one on my Amazon threads.

1. He is obviously referring to the original White House LFCOLB PDF image and the exhaustive work that you and your experts such as Vogt have done to uncover evidence of a forgery.

2. The LFCOLB image in the four-page Tepper document is not the same image. This latest image has been flattened, rasterized, re-colored, touched up, and then the 17 hidden objects were added to redraw lines and to strike and redact most of the text.

3. Some of the layer examinations using Adobe Illustrator of the LFCOLB image that your experts did previously on the original WH LFCOLB are not applicable to the page 4/11 LFCOLB because the nine layers that were present in the original LFCOLB have been flattened into one layer. The only other objects that appear as layers are the added hidden objects. So the new page 4/11 LFCOLB consists of the flattened image layer from the original LFCOLB plus 21 layers of hidden stuff. The flattened image layer is the bottommost layer in the layer list. Think of a stack of pancakes. The flattened layer is the bottom pancake and the other pancakes are all hidden. None of this hidden stuff was in the original WH LFCOLB. The only information from the original WH LFCOLB is all contained within the one flattened layer. Of course, this layer, when the hidden objects are invisible, likely contains the same written information as on the original certificate. This is how the image looks in Adobe Reader (as an altered image of the original WH LFCOLB). However when the page 4/11 is loaded into Adobe Illustrator and the eye ball button is clicked all the invisible stuff magically appears just like the spy developing the invisible ink. I would bet my life that both Fuddy and the Hawaii AG each separately have all the Adobe products.

4. So this Obot is off target. He doesn't know about the page 4/11 LFCOLB. He believes that you are still looking at the original WH LFCOLB. Boy! is he going to be shocked!

I know you are extremely busy getting ready for Friday Nov 2 but I thought of something else that you should know. I first stumbled onto a link to the Tepper four-page document on Scribd. I wanted to read the Mississippi request for verification letter. When I looked on Scribd, I noticed that the document was supposed to be four pages but only three pages were uploaded to Scribd. The 4th page was missing. So whoever uploaded the four-page document intentionally left out the page 4 LFCOLB image. I'm guessing that whoever uploaded the document on Scribd believed that the readers would assume that it was the original WH LFCOLB. When I couldn't get the page 4 from Scribd, I registered my credit card on PACER and then downloaded 10513240131.pdf off the Mississippi court web site. This download of course included page four. It would likely be worthwhile to identify the person who uploaded the Tepper document onto Scribd and take his deposition to determine why he omitted page four in his upload.

I first discovered the altered LFCOLB image in the MDEC document:

06/06/2012 35 MOTION to Supplement Counsel for MDEC's Response 30 in Opposition to

Plaintiff Taitz's Motion for Sanctions 25 re 30 Response to Motion, by Democrat Party of Mississippi (Attachments: # 1 Exhibit MDEC Counsel Request to HI DOH for Verification of President Obamas Hawaiian Birth Cert, # 2 Exhibit Hawaii DOH Verification of President Obamas Hawaiian Birth-Issued May 31 2012)(Begley, Samuel) (Entered: 06/06/2012).

I downloaded this one off Scribd before I looked for the Tepper document. This court 35 document has "the Friends of the Fogbow logo" on each page. The Tepper Scribd document does not have this same logo.

Henry
