

**DECLARATION OF ORLY TAITZ FILED IN CONJUNCTION WITH AMICUS CURIAE
AND IN SUPPORT OF PLAINTIFF UNITED STATES IN 8:25-CV-01370 UNITED
STATES OF AMERICA V ROBERT PAGE**

1. I, Orly Taitz, am an attorney, duly licensed in the state of California.
2. Previously, I ran for state-wide office in the state of California and, as a candidate, I received a computer disk of all the voters with their information.
3. Additionally, I was one of the attorney observers for the GOP and Trump campaign in 2024 presidential election.
4. As an attorney-observer I was assigned the area of city of Irvine by the GOP coordinator.
5. I personally visited each and every voting place in the city of Irvine during the 2024 election.
6. When I visited the voting place at the University of California at Irvine I observed a large line in front of the voting place. I talked to the captain in charge of the voting place and I advised her that I am an attorney -observer. She stated that her name was Elena. I noticed that she spoke with an accent and asked where she was from. She stated that she was from Russia and I continued the conversation with her in Russian. She disclosed to me that some 80% of people waiting in line were not registered to vote. All of them were given registrations on the spot and all were allowed to vote immediately. No verification of anything was done. The directions from the registrar's office were to allow everyone to vote.
7. UCI (University of California at Irvine) has some 40,000 students. 80% of that is 32,000. I am not saying that exactly 32,000 were not previously registered, but it is clear that thousands were not previously registered to vote. It is my understanding that this was going on at all campuses of UC and Cal State system.
8. Thousands of students at UC and Cal State systems are not US citizens.

9. Additionally, thousands of students are not residents of California. The state of California charges thousands of students out of state tuition, as out of state residents, at the same breath all of these students are allowed to vote as California residents. These university votes significantly changed the results of the elections.

10. I observed that nobody checks whether individuals registered to vote in multiple states. Nobody is requesting individuals to cancel their voter registrations in other states before voting in California.

11. As an example, in 2010 I ran for Secretary of State in Republican primary in California against an individual by name Damon Dunn, who at the time he registered to run for Secretary of State in California, as a Republican, was also registered in two other states, Texas and Florida, as a Democrat. At a time I filed a complaint with the Secretary of State of California and I filed an election challenge in the Superior Court of California case 30-2020-00381664 before Hon. Jeffrey Glass. In spite of a motion for expedited handling of the case, the presiding judge postponed the case until after the general election with a promise to reverse the results of the election if fraud is found, and later dismissed the case without any explanation. If a person was allowed to run for Secretary of State in California, while being registered to vote in two other states, it is likely that thousands more out of state residents were voting in California.

12. I ran for state -wide office twice. During my run for office I requested a computer expert to analyze the data of the computer disk with voter information, which was provided to me by the Secretary of State. I attach herein two affidavits of the computer expert David Yun.

13. According to CA election code 2150 a voter registration is supposed to contain a valid birth date, country of origin, first and last name, prior registration, address, information disclosing whether the prospective voter is a felon or parolee, a drivers license, last 4 digits of the social security number of an identifier number.

14. A valid place of birth is required according to California voter registration guide. According to expert David Yun 685,719 records did not have a valid place of birth.

15. According to expert David Yun, 130,019 voters were over 100 years old.

16. According to expert David Yun, 140,861 were likely duplicate records.

17. According to expert David Yun, when all 8 required parameters are considered, there are likely hundreds of thousands of invalid registrations in California state-wide data bases.

18. Furthermore, when, I as an attorney-observer, I visited a voting place in Northern Irvine, north of Irvine Valley College, I asked the precinct captain if she observed any irregularities. She stated that one woman came to vote and the records showed that she already voted or someone else voted under her name. I asked, what are the policies and procedures in this situation. She stated that the registrar's directions are to let everyone vote, it is flagged and the registrar's office will sort it out. I asked, how do they sort it out. If two people voted under the same name and one voted for Trump and another for Harris, how do they know who is the real voter and who is the fraud and which candidate gets the vote. The precinct captain was clueless. This is of great concern as DOGE recently discovered 25 million active Social Security records of people over 100 years old. It was reported that recently the Social Security administration removed from active databases 12 million social security numbers of individuals over 120 years old. According to the Guinness book of records, the oldest American is 114 years old (www.guinnessworldrecords.com).

19. As an attorney, with the help of multiple licensed investigators, I compiled an attached 148 page file, (Exhibit 2, Evidence of Forgery and Fraud) showing that former president Obama used a Connecticut Social Security number xxx-xx-4425 of an individual born in 1890, whose death was not recorded in the SSA records. Mr. Obama used this number while residing in the White House and he inadvertently published it when he posted his tax returns on WhiteHouse.gov on April 15, 2010 at 11am and he did not properly redact the file. (the file was redacted a few hours later, but the information was already public). This was immediately a red flag, as this was a Connecticut Social Security number and Obama was never a resident of Connecticut. Aforementioned file shows evidence of forgery in multiple other IDs and documents used by Obama, such as Selective

Service Registration, long form birth certificate and others. This shows a magnitude of fraud and need for the plaintiff herein, United States of America, to examine all unredacted voter registration records not only of the voters, but also of all the candidates, who ran, specifically Barack Obama's, as he ran in 2008 and 2012.

I, Orly Taitz, declare that all the aforementioned is true and correct to the best of my knowledge and informed belief.

/s/ Orly Taitz
