

that the form type was scanned in at a lower resolution (≤ 200 dpi). This is because of the size of the pixels on the letters were such that the openings on the *a* and *s* on the first line are not visible and filled in. This may also further indicate that forger took some of the type images from the microfilmed copies.

Figure 11. showing a mixture of grayscale and binary type on the same line.

Another example is found in form box 1a, his name *BARACK* for some reason the “R” is a grayscale image and the rest is binary (see Figure 13). That means the “R” was originally on the form and the rest was not until it was added.

The question again is: Why did the forger leave some grayscale type images on the form and not just erase the whole form? The answer is that he/she needed the grayscale images to re-establish the baseline of the type for the superimposed binary type. This also told me that the forger was an experienced graphic artist.

Figure 13. Another example of grayscale and binary on the same line.

Figure 14. The last “1” is grayscale, but the rest are binary.

Another example is the Certificate number itself (see Figure 14). The last “1” on the form is a grayscale image but the rest of the numbers are not. It also has a different baseline. This is just another example of a cut and paste job. It also means we do not know what the real Certificate number is if there even is one. There are other form boxes that display the same feature, boxes: 5b, 7e, 11, 13, 16, 18a.

4. The Sequential Number is a fraud. I would like you to refer back to Figures 1 and 2. You will notice that Barack Obama was supposed to have been born on Friday at 7:24 p.m. August 4, 1961 and the local registrar supposedly accepted it on Tuesday August 8, 1961 and hand stamped the Certificate number “61 10641.” Then notice that the other Certificate of Susan E. Nordyke was born on Saturday at 2:12 p.m. August 5, 1961 and another registrar date stamped it on August 11, but her Certificate number is “61 10637.” Susan Nordyke was a twin and her sister’s Certificate number is 61 10638. Keep in mind there would be only one Bates stamp machine in the office so the numbers would all be unique. There cannot be any duplicates so every Certificate has a unique serial number.

Obama's Certificate would have most likely been mailed on the following Monday, the 7th and received by the Clerk Tuesday the 8th. Susan Nordyke and her sister's Certificates looks like they were mailed sometime earlier that week and not accepted until the 11th but Susan has a Certificate four numbers less than Obama's. It is impossible to have Obama's Certificate number to be four numbers higher than a Certificate that came in three days later.

As stated in #3 the last "1" on the form is a grayscale image but the rest of the numbers are not (see Figure 14). You will also notice that the baseline of the last "1" is straight and level but the rest of the numbers are slanted. This is again irrefutable proof that the Certificate number is a composite of two numbers and hence a forgery. This forgery comes under a separate offense and carries with it 5-years in prison [see Appendix D: Title 19, Ch.47, Sec, 1028(d)(1)].

The facts I have shown you in #3 and 4 tell me several things about how this forgery was assembled. 1. Some person(s) in the Health Department, who had access to the document imaging program, searched the database for someone close to the actual birth date of Obama and found someone near the 4th of August, if in fact he was born on the 4th and we should not assume that at all. Obama may have chosen the 4th of August because they had a baby who died close to his date of birth. The clerk may have cross referenced the death database to find someone who had died and had a birth date close to Obama's. It has been reported that an infant girl named Virginia Sunahara was born on August 4, 1961 at Wahiawa Hospital in Wahiawa, Oahu, HI who died on August 5, 1961 at the Kapiolani Women and Children's Medical Center, due to complications. This happens to coincide with the date of birth and birthplace of the Nordyke twins. We could make two assumptions here. 1. Wahiawa Hospital customarily would have completed the COLB form and mailed it to the County Health Department; and 2. Kapiolani Medical Center would have filled out the death certificate. The other less likely scenario could be that her medical records were transferred to Kapiolani Hospital and they would produce the birth certificate and later the death certificate which was later included in the group of birth certificates that contained the Nordyke twins.

The Federal Government wanted the States to cross reference the birth and death databases so the database would have that information. The date stamps have two different colors and sizes (see #5 below) which indicates that both dates came from different Certificates. We can conclude from this that more than one person was involved in the Hawaii Department of Health in assembling the different components that were used: 1. Someone to conduct the database searches to find the right Certificates to create the fraudulent Certificate of Live Birth; and 2. Someone who signed or stamped the fraudulent certificate. I believe that after all the components were assembled they were then given to a graphic artist to actually assemble the whole thing and create the finished forgery. That graphic artist could be located anywhere. In short this was a multi-state conspiracy to defraud the United States.

5. Two different colors in Form box 20, 22 and 17a Date Accepted by Reg. General. What is very revealing about this box and date entry is there are two different colors on both lines where there should be no color at all. Both lines were scanned using binary mode, but I see two different colors (see Figure 15). What I think this shows us is that the person who put this fraud together was looking for a form that had the right date namely "August 8 19_1." As you can see the only things that are printed in dark green (R=71, G=92, B=73) are "Date A" and "AUG -8 6." The rest of the type is in black. This tells me that the forger was working in color mode and what they copied from had a color value for some reason unless they put a color value on it.

Figure 15. Two different colors, dark green and black.

The same thing is found in form box 20 “Date Accepted by Local Reg.” Figure 16 again shows that the date has two different colors. The “AUG -8 196” is in dark green (R=87, G=111, B=87) and the “1” is in black. Yet again another irrefutable proof this form is a forgery. Form box 17a displays the same two color image in the word “None”. The “Non” is in dark green.

Figure 16. Another example of two colors on the same line.

6. The official seal is not part of the Certificate of Live Birth and they used the wrong size impression of a seal. The Hawaiian law (Section 11-1-2 Seal of the Department of Health) states:

a) The official seal of the department of health shall be circular in shape, **two and one-fourth inches in diameter**. At the curve on the top portion there shall be the words “DEPARTMENT OF HEALTH” and at the curve on the bottom portion there shall be the words “STATE OF HAWAII.” At the curve on each side portion shall be a star. In the center of the seal shall be the Caduceus, a winged rod entwined with two serpents, which has long been recognized as a universal symbol of medicine. The Caduceus shall be encircled by an indentation, which shall separate it from the words “DEPARTMENT OF HEALTH” and “STATE OF HAWAII .”

Figure 17, Seal on Obamas Short Form

Figure 18: Nordyke seal from 1966

Figure 19: Obama’s COLB long form Apr.2011

(Figure 19 is courtesy of Kevin Powell; <http://www.pixelpatriot.blogspot.com>)

The first Certification of Live Birth Obama the candidate produced in June of 2008 was the “Short Form” of the COLB. It had the Department of Health’s seal embossed on it (see Figure 17) appearing on it about 1.8” from the bottom of the 11 inch paper. That told me the Health Department is using an electric embosser, which applies ample pressure to leave a clear visible embossment. Hand seal embossers have only 7/8” or less from the edge of the paper for a 1 3/4” seal. The Health Department seal does not appear obvious on the Obama COLB. A good embossment will distort the type and lines on a form and is clearly visible (see Figure 21). Even on the Nordyke Certificate (see Figure 18) in spite of it being an inverted image from a microfilmed image, it is clearly seen. Figure

19 shows Obama’s seal on the COLB presented on April 27, 2011, and is visible only because a color filter was used to see it, otherwise it completely disappears in the design of the security paper (see Figure 20).

Figure 20: Seal on Obama’s COLB From April 27, 2011.

Figure 21: Hand stamped seal from an original COLB from 1962.

The official seal on the Obama COLB is a second or even third generation image from another form. The seal embossing did not distort the lines or type on the form and it most likely was never part of his Certificate. We cannot make out any of the type on the seal as well as the two stars and the Caduceus. The distorted background image of a seal can be created using Photoshop or Illustrator by applying it as a watermark. Yet another indication this Certificate of Live Birth is an obvious forgery.

If that wasn’t enough I then investigated the size of the latent seal image on the Obama certificate and found it to measure only about 1¼” in diameter. The procedure I used to discover the seal measurements were as follows: With the Savannah Guthrie photo (see Figure A) of the document I was able to see the left and right hand sides of the document and knew that was 8½” wide. I was then able to determine the scale of all the components on the form. I then measured the line length on the second line from the bottom. Box 20, 21 and 22 rest on. That length is 6.396” long, measured from the first bold vertical line on the left side of the form to the end of the line (see Figure 22). I then adjusted all the images I had for Certificates including non-Obama Certificates, which I had. What I found was that the alleged embossed seal on the Obama COLB were all 1¼” in diameter and that is not the legal seal as described by Hawaii state law, which should be 2¼”. The administration has the wrong size seal on their certificate and that seal was supposed to be a first generation full size imprint.

Figure 22. The COLB Obama presented on 4/27/11 from the PDF file on the White House web site. The seal measured only 1-7/8” in diameter.

I then examined Certificates of other individuals that I found on the internet. Figure 23 is of a Certification short form of Patricia Decosta dated 2002 and it is also 1¼”. As stated in the Hawaii state code, it must be 2.25” in diameter. The current Department of Health seal is not the same one they had in the 1960s. That one was 2¼” in diameter (see Figure 18) but the current seal is not legal—it’s the wrong size and the type is not legible! You cannot make out any of the words, the stars or the Caduceus. I will be notifying the Department of Health of their gross error in the hope

they will fit it with a new legal seal. Some time after 1966 the original legal seal was “lost” or stolen because they do not wear out. Some bureaucrat ordered a replacement and was either ignorant of the law or too stupid to ask if there was a specific requirement for the seal. What mystifies me is that the Director of the Department of Health and the registrars did not spot the error and fix it. My conclusion is they just didn’t care about the law.

Figure 23. The Certification of Patricia Decosta dated 2002.

7. The hand stamped certification from the current registrar is a forged stamped notice.

The Department of Health has the right to produce a legal copy of the original Certificate of Live Birth for people who have the appropriate right to receive one. The Clerk in the office would search the document imaging database and retrieve the correct Certificate. The Clerk would then print out the tiff image on the green security paper. They would then take a rubber stamp that states the following: I CERTIFY THIS IS A TRUE COPY OR ABSTRACT OF THE RECORD ON FILE IN THE HAWAII STATE DEPARTMENT OF HEALTH. Then below this notice would be the likeness of the State Registrar’s signature, in this case it was Alvin T. Onaka, Ph.D. Then the clerk would stamp the date to the left of the certification. See Figure 24 for a Certificate done one month before the Obama’s April 25, 2011 Certificate. Please note that since it is a hand stamp the certificate stamp is skewed up on the right side.

Figure 24. Registrar stamp on a persons Certificate done March 2011.

Now let us look at Obama’s Certificate (see Figure 25) supposedly done on Aril 25, 2011. Notice the registrar’s rubber stamp has an error on the word “the” which reads “TXE,” but this error does not show up on the same rubber stamp used one month before. In Figure 26 you will see an enlargement of the word. You will notice that the “X” had been created by the graphic artist by filling in pixels so it appears like an “X” but it really is not. Also notice that the whole stamp is too straight on the form. The red lines drawn under two of the lines of type are aligned with the pixels. The stamp rises only two pixels over 3”. My conclusion is that the whole stamp was placed there by the graphic artist to look as straight as possible. The only problem is that no hand stamped notice like this would be placed that perfect on the page.

Figure 25. Obama's Registrar stamp with the errors on it,

Figure 26. Enlargement of the "TXE."

Other investigators have mentioned what looks like an italic "E" under the capital "A" in Alvin. In Figure 24 the same artifact does not appear. This artifact also does not show up on the Savannah Guthrie photo but does appear on all the other copies and PDFs the White House displayed. We have to assume either the artifact was already on the security image the forger used, and forgot to erase it, or it was placed there deliberately for some reason that we don't know yet.

8. Forged signatures of the Mother and Registrar. Forgery of a signature occurs in three ways. The old methods were someone would practice signing another's signature until they got good at it. Another was to simply trace the signature from a previously known signature. The new way is to find a signature and scan it into a computer. Then place that signature, or parts of a signature, onto the desired form or check. The signature of the mother, *Ann Dunham Obama* in Box 18a is made up of two images. The "Ann D" is in grayscale and the rest of her name is a binary image. The signature of the registrar *U"K"L Lee* is also made up of the same image types. The "K" really looks like "IL" and the *I* is a binary image and the rest of his name is grayscale. That means the *I* was added in another layer. Both errors can be seen included in Figure 27. Irrefutable proof the Obama Certificate is a forgery.

9. Multiple layers in the PDF file from the White House. I am not the first one to find this fact and they deserve the credit for discovering it. What they discovered is that when you open up the PDF file in Adobe Illustrator and you turn on layers, you see a long list of nine different layers that correspond to different sections of the form, including the signatures on the form. Figure 27 shows the layer that contains most of the typewriter and form text.

I discovered using just my Adobe Acrobat 8 Standard that I could also see the different components disappear when I enlarged the image to just 400% and used the "hand" tool to quickly move around the image. When I moved the image fast, the various type components would disappear from the form but the lines stayed just as I had concluded.

I also opened up the White House PDF file in WordPad so I could see the codes and headers in the file. There I discovered the evidence for the nine layers embedded in the code (see below). The big surprise I discovered was that the file was finished or created on April 27, 2011 at 12:09 pm and the copy I had downloaded from the White House web site was modified on April 28, 2011 at 9:58 am, the day after the news conference. The whole White House story that the President had his Seattle-based lawyer fly to Hawaii and pick up two signed and stamped paper Certificates of Live Birth and fly directly to Washington DC, is obviously not the document the public has been shown. In other words the whole story may not be true. I checked the cost for UPS to ship the documents next day and delivery by 8:30 am Tuesday and it was only \$84.00. I checked the cost for a lawyer to fly last minute from Seattle to Hawaii then to Washington DC it is thousands of dollars. Their story is just not believable.

The PDF file indicates the PDF "CreatorTool" was *Preview* which is an Apple product that is just like Adobe's Acrobat Standard, which is a viewer and print driver. It is not a photo and image design program. It is just the program that created the PDF file (as a print driver). The Preview program can

also read twenty-six different image and document types, that includes Adobe Illustrator and Photoshop.

Defenders of the Administration’s argument that the layers were created by an OCR program (Optical Character Recognition) are also ridiculously wrong because the PDF file is not a searchable PDF therefore no OCR process was performed and additionally no text object was found within the PDF file I examined.

The discovery of nine layers in the PDF image didn’t matter for my analysis 1 through 7 because I was able to export the image as a TIFF (18.35 MB) out of that PDF using my Adobe Standard software. So I was working from a flattened image and was able to find all that I did, in other words the layers were irrelevant to me but was just further proof that the Obama’s Certificate of Live Birth is a forgery.

STATE OF HAWAII CERTIFICATE OF LIVE BIRTH DEPARTMENT OF HEALTH
FILE NUMBER 151 61 1064

1. Child's First Name (Type or print) 2. Middle Name 3. Last Name
BARACK HUSSEIN OBAMA, II

4. Sex 5. This Birth 6. If Twin or Triplet, Was Child Born Month Day Year Dh. Hour
Male 7. This Birth 8. If Twin or Triplet, Was Child Born August 4 1961 7:24 P.

9. Place of Birth: City, Town or Rural Location 10. Island
Honolulu Oahu

11. Usual Birth Place of Mother: City, Town or Rural Location 12. Island
Honolulu Oahu

13. Street Address 14. Is Residence Outside City or Town Limits?
6085 Kalamianole Highway Yes

15. Mother's Mailing Address 16. Is Residence on a Farm or Plantation?
Yes No

17. Full Name of Father 18. Race of Father

18 Wichita Kansas 6

29. I certify that the above stated information is true and correct to the best of my knowledge. 30. Signature of Parent
Michelle Obama

31. I hereby certify that this child was born alive on the date and hour stated above. 32. Signature of Local Registrar
Michelle Obama

33. Date Accepted by Local Reg. 34. Signature of Reg. General
8/8/61

35. Evidence for Delayed Filing or Alteration

Figure 27: The layer that contains most of the forms text and typewriter text.

I have received other White House PDF files from Graphic artists around the country. As a result I received a PDF Certificate that was put up on the White House web site no more than 10 minutes after it was uploaded. That PDF showed nine layers, no OCR (see Figure 28), Image file created at 7:50 am on the 27th (see Figure 29) and finally the PDF file created using *Preview* (the print driver) and modified on 4/27/11 at 12:09 p.m., which is similar to my file. My conclusion is that this shows the individuals in the White House were “fixing” or changing this forgery as late as 7:50 a.m., an hour before the pre-news conference.

Figure 28. Shows 9 layers and no OCR.

Figure 29. Created 7:50 AM

Figure 30. PDF modified 4/27/11 @ 12:09 am.

A Rebuttal to the Discovery of the Multi Layers Found in the PDF File.

To begin with the White House PDF was not a searchable PDF therefore no OCR process was performed on the image and therefore the following rebuttal and defense of Obama’s COLB is irrelevant and a very poor attempt at defending this blatant forgery.

The only rebuttal to the nine layers discovered in the PDF file released by the White House was a statement from Canadian graphic artists from Quebec by the name of Jean-Claude Tremblay on April 29. It was reported by Fox News and on their web site at:

<http://www.foxnews.com/politics/2011/04/29/expert-says-obamas-birth-certificate-legit/>.

He tries to excuse the multi-layers as merely an artifact of an OCR (Optical Character Recognition) engine and then saved as a PDF. There are three major reasons he is wrong and I know from his statement he knows nothing about OCR engines and how they work and their file structure. First the White House PDF file is not a searchable PDF and no text object could be found in the PDF file. Second, the Obama PDF certificate was supposed to have come directly from the Health Departments office. As stated before, the records they have would have absolutely no reason to be OCRed and if they were asked to give the customer a PDF image it would be from their existing TIFF image stored in their document imaging program on the server. The program would have done no OCR processing at that time.

The third reason is the lack of OCR files in the PDF file. My qualifications on OCR programs are considerable. Our own document imaging program, TheRepository, has an OCR option from Expervision that is called TypeReader. We integrated TypeReader into our program but to do this we had to sign a non-disclosure statement with them and then we got their Took Kit and API. When an OCR program saves a file as a searchable PDF, the file contains three main files within it. The first file is an image file, usually a compressed Group4 TIFF. The second file is an ASCII text file and the last file is a matrix file that contains the X and Y coordinates of all the words in the document. The starting point for the image file and the matrix file is usually the upper left hand corner of the image measured in pixels. The text file and matrix files would never be seen as separate layers and there are certainly not nine layers. The three files would be in a PDF "wrapper" and that is all. All OCR programs work on the same principle.

Conclusion

The Certificate of Live Birth Obama presented on television on Aril 27, 2011 is a forgery.

In witness whereof he has hereto set his hand and seal.

Name of Notary: HPNG LI

Title: CSM

I, HPNG LI, a Notary Public of King County and the State of Washington aforesaid, hereby certify that Douglas B. Vogt personally known to me to be the affiant in the foregoing affidavit, personally appeared before me this day and having been by me duly sworn deposes and say that the facts set forth in the above affidavit are true **NOT** correct.

Witness my hand and official seal this the 10th day of May 2011

EXHIBIT 14

The American Typewriter

How a Young Computer Graphics Person Could Not Understand How to Use a Computer to Forge a Typewritten Document.

It's been some 30 years since we have used typewriters to produce documents. Computers have replaced the typewriter and given us great advantages in document preparation. There is no need to understand the old typewriter. Except when you need to forge a typewritten document.

A computer in the hands of a young person who can create a modern forgery is no match for the old style quirky mechanical typewriter. The forger who produced the Obama Hawaiian Long Form Health Department Birth Certificate may have thought that all typewriter typeface styles were alike. To get his letters he should have assumed that he needed only to match typewritten letters found in the old files of Hawaii birth certificates to scan ... copy and paste into his new document. Those old files should be all alike having been used to produce birth certificates in the 1961 era.

He must have understood that he needed to copy the old typewriter styles and would find them in the files.

But understanding scanners ... he also had to know that scanning a letter "t" one time and using it all over his document would be conviction assured. Because scan lines engage a letter differently every time it's done. So he scanned a bunch of old birth certificates and used a different "t" each time.

The mistake was that many of the letters in the old files were from different typewriter styles and that's something he did not realize ... resulting in many typewritten letters on his forgery that did not match each other.

I hope this helps to explain what might have happened with this document.

Every typewriter typed character is assigned a number in the order it is found in the document.

EVIDENCE OF FORGERY

The two capital letters "A"s are from the word "BARACK" on the birth certificate found at section 8 of the form. There is only one letter between them. Why then is #144 significantly bigger than #146 if the same type-writer key struck both.?

From Section 8

The two capital letters "R" are from the same word "BARACK" as above and the other word "BARACK" in section 1 of the form. Why then is #3 significantly shorter and wider than #145 if the same typewriter key struck both? Note also the enclosed area in #145 is smaller than the enclosed area in #3 even though #145 is taller.

Notice the other differences seen in the same word from different locations on the birth certificate. All the letters look different. Why?

From Section 1

The two lower case letters "s" from the word "Hospital" in section 6c and "University" in section 12b are shown to be different because of the width of the letters. The lower case "s" #88 is wider than the lower case "s" in #198 as shown with the green and purple color bars shown under the letters.

From Section 6c

From Section 12b

The two numbers "2" are from "7:24" in section 5b and section 10 of the form. Why then is #40 significantly wider than #168? Notice also the difference in height of #168. Can you imagine how these two typewritten letters were typed with the same typewriter?

From Section 5b

From Section 10

The two lower case letters “a” from the word “Male” found in section 2 and the word “Kapiolani” found in section 6c. Notice that the first “a” #23 is not as wide as #56. Also note the differences of the shape of the enclosed areas and the serifs at the top left of both.

From Section 2
Male
22 23 24 25

From Section 6c
Kapio
55 56 57 58 59

The two lower case letters “i” from the word “University” in section 12b and “Kapiolani” in section 6c are shown to be different because of the dots over the letters. The dot in #199 is higher than that of #58 and shows more space over the letter. Also note the color bars indicating the difference in width between the letters.

From Section 12b
ersity
196 197 198 199 200 201

From Section 6c
piola
57 58 59 60 61

The two capital letters “S” are from “HUSSEIN” in section 8 and “STANLEY” in section 13 of the form. Why then is #151 significantly more narrow than #201? Notice also the serif differences indicated with the arrows showing that the serif on #151 is placed further back to the left on the “S” than as shown on #201.

From Section 8
HUSSEI
149 150 151 152 153 154

From Section 13
STANLE
201 202 203 204 205 206

The two lower case “n” letters are different in size. #62 found in section 6c is much shorter than #193 found in section 12b. This is a good place to insert a photo of a typewriter key to remind us that the impression is struck by an engraved letter that is steel and incapable of changing size.

It all the letters are from the same
typewriter .. why don't
they match? It appears that it
was put together with letters from
different sources
and this means it's a forgery!

Dear Orly:

The affidavit is enclosed.

God bless you and speed your excellent work!

Charles R. Coombs

Affidavit

My name is Charles Ralph Coombs. I am 71 years old and working as a semi-retired entrepreneur. I currently reside at 1730 Valley View Lane, Apartment 1093, Irving, Texas 75061.

I have been working as an electronic typesetter in conjunction with every job I've held since 1980. I am currently using a desktop publisher to create and typeset all the information needed to start and advertise a business. Between 1976 and 1980, I sold typewriters for Olivetti Corporation. I acquired detailed knowledge of typewriters of the type I was selling and those of our competitors. Some of the typewriters I sold were to a degree self-correcting, and comparing them with competing brands gave me a detailed knowledge of the kind of errors typewriters and typists make and how to compare outputs from different machines.

Based on my professional knowledge and experience, I believe that the document presented as an electronic copy of the birth certificate of "Barak Hussein Obama" is a forgery.

By examination of the document, I find the following typographical inconsistencies:

1. There is a variation in size between two impressions of the same character. This is not possible in a document prepared on a standard (type basket) typewriter.
2. Spacing between letters is inconsistent. This is not possible in a document prepared on type-basket typewriter.
3. Some letter pairs are kerned: They are moved closer together to avoid white space between certain letter pairs in a desktop publisher. This is not possible in a document prepared on a standard, fixed-font typewriter. Some IBM typewriters featured a 1/2-point "pseudo kerning" feature, but the use of this was a laborious process and there is no evidence of the original document's having been produced on such a high-end, expensive machine.
4. There are typeface (character shape) mismatches in repeated occurrences of the same character. This is not possible in a document prepared on a type basket typewriter.
5. Only one instance of one character is slanted. Slanting occurred when a typist struck two keys at once, forcing them together. The slanting would occur as a consequence of the typist's forcibly returning the keys to their normal position. This, however, causes a permanent defect in all subsequent occurrences of this character that does not occur in this document. It cannot therefore have come from the typewriter used to create the original document.
6. Some characters appear above or below the baseline. This is possible with this kind of typewriter, but at the least would indicate that the document was removed and replaced: Simply moving rolling the platen up or down would not affect the line spacing to this degree.

I declare to the best of my knowledge and belief that the information herein is true, correct and complete.

County of Maricopa)

AFFIDAVIT

I, the undersigned, being first duly sworn, do hereby state under oath and under penalty of perjury that the facts are true:

1. I am over the age of 18 and am a resident of Arizona. The information contained in this affidavit is based upon my own personal knowledge and, if called as a witness, could testify competently thereto. I am the duly elected Sheriff of Maricopa County, Arizona, and I have been a law enforcement officer and official, in both state and federal government, for 51 years.
2. In August of last year, a group of citizens from the Surprise Arizona Tea Party organization met with me in my office and presented a petition signed by approximately 250 residents of Maricopa County, asking if I would investigate the controversy surrounding President Barrack Obama's birth certificate authenticity and his eligibility to serve as the President of the United States.
3. This group expressed its concern that, up until that point, no law enforcement agency in the country had ever gone on record indicating that they had either looked into this or that they were willing to do so, citing lack of resources and jurisdictional challenges.
4. The Maricopa County Sheriff's Office is in a rather unique position. Under the Arizona Constitution and Arizona Revised Statutes, as the elected Sheriff of Maricopa County, I have the authority to request the aid of the volunteer posse, located in the county, to assist me in the execution of my duties. Having organized a volunteer posse of approximately 3,000 members, I, as the Sheriff of the Maricopa County Sheriff's Office, can authorize an investigation go forward to answer these questions at virtually no expense to the tax payer.
5. The Cold Case posse agreed to undertake the investigation requested by the 250 citizens of Maricopa County. This posse consists of former police officers and attorneys who have worked investigating the controversy surrounding Barack Obama. The investigation mainly focused on the electronic document that was

presented as President Obama's long form birth certificate to the American people and to citizens of Maricopa County by the White House on April 27, 2011.

6. The investigation led to a closer examination of the procedures regarding the registration of births at the Hawaii Department of Health and various statements made by Hawaii government officials regarding the Obama birth controversy over the last five years.
7. Upon close examination of the evidence, it is my belief that forgery and fraud was likely committed in key identity documents including President Obama's long-form birth certificate, his Selective Service Registration card, and his Social Security number.
8. My investigators and I believe that President Obama's long-form birth certificate is a computer-generated document, was manufactured electronically, and that it did not originate in a paper format, as claimed by the White House. Most importantly, the "registrar's stamp" in the computer generated document released by the White House and posted on the White House website, may have been imported from another unknown source document. The effect of the stamp not being placed on the document pursuant to state and federal laws means that there is probable cause that the document is a forgery, and therefore, it cannot be used as a verification, legal or otherwise, of the date, place or circumstances of Barack Obama's birth.
9. The Cold Case Posse law enforcement investigation into Barack Obama's birth certificate and his eligibility to be president is on-going. The on-going nature of the investigation is due to additional information that has come to light since we held the press conference in March, 2012. As soon as that information has been properly verified by the Cold Case Posse, I will release that information to the public.

Executed this 12 day of June, 2012, in Maricopa County, Arizona.

Joseph M. Arpaio, Maricopa County Sheriff

Sworn to and subscribed before me this 12th day of June, 2012.

In August 2008, Daylife.com posted at <http://www.daylife.com/photo/01u33pL9Ns06D> an image listed as an "AP Photo" at: <http://cache.daylife.com/imageserve/01u33pL9Ns06D/610x.jpg> Daylife describes this as:

"This registration document, made available on Jan. 24, 2007, by the Fransiskus Assisi school in Jakarta, Indonesia, shows the registration of Barack Obama under the name Barry Soetoro into the Catholic school made by his step-father, Lolo Soetoro."

Aaron Klein of WorldNetDaily cited this image as: "A 2007 Associated Press photograph taken by Tatan Syuflana, an Indonesian AP reporter and photographer". Klein reported: "Jack Stokes, manager of media relations for the AP, confirmed to WND the picture is indeed an AP photo."

Ref: "Was young Obama Indonesian citizen? Document, travel suggest 'Barry Soetoro' member of world's largest Muslim country" Posted: August 17, 2008, 8:18 pm Eastern, © 2009 WorldNetDaily

Nedra Pickler AP reported: "A spokesman for Indonesia's Ministry of Religious Affairs said claims that Obama studied at an Islamic school are groundless.

"SDN Menteng 1 is a public primary school that is open to people of all faiths," said the spokesman, Sutopo, who goes by only one name. "Moreover, he studied earlier at Fransiskus Assisi, which is clearly a Catholic school." . . .

At first, Obama attended the Catholic school, Fransiskus Assisi, where documents showed he enrolled as a Muslim, the religion of his stepfather."

"Obama Debunks Claim About Islamic School", By NEDRA PICKLER, The Associated Press, Wednesday, January 24, 2007; 4:23 PM Washington Post, McDowell and Associated Press reporters Ali Kotarumalos and Zakki Hakim contributed to this report from Jakarta, Indonesia.

http://www.washingtonpost.com/wp-dyn/content/article/2007/01/24/AR2007012400371_pf.html

Laotze at "An American Expat in Indonesia" posted on January 24, 2006: "Above is a photo of Asisi Primary School in Jakarta, Indonesia the Catholic school that Barack Hussein Obama attended prior to attending Besuki Primary School.

Barack Hussein Obama was registered under the name "Barry Soetoro" serial number 203 and entered the Franciscan Asisi Primary School on 1 January 1968 and sat in class 1B.

School documents listed Barry Soetoro as an Indonesian citizen born in Honolulu, Hawaii on 4 August 1961. Barry's religion was listed as Islam. School documents further record Barry's father as "L Soetoro Ma" who worked as an official of the Director General's office in the TNI Topography division of the Indonesian Army.

Barry attended the Franciscan Asisi Primary School for three years until class 3 afterwards his family moved house from H Ramir Street to Dempo Street where he attended Besuki Primary School for one year before departing to Hawaii."
